6th GJU Career Fair

Empowering GJU Students & Graduates

الجامعة الألمانية الأردنية
German Jordanian University

Editors: Linda Berger, Stefanie Luniak
Office for Industrial Links

Design/Layout: Deena Holz, Tamam Shaban

Welcome note

3

Dear students and guests,
Welcome to our 6th Career Fair!

I am proud to say that this event has become a traditional activity of GJU, and one of its students' and graduates' regular supporting platforms. I always claim that GJU works as a German machine, and I believe that the Career Fair event has become an indispensable component of our GJU machine. Our Career Fair event has also become a sustainable bridge between our university and local & regional industry. In this context, I would like to express my great pleasure with the responsiveness of all attending firms and companies to share this event with us. We also hope that our platform would give these companies the opportunity to meet with our students and graduates, interact with them and have a direct impression about their potentials and capabilities.

Last year was the first time to offer a special corner for Entrepreneurship as part of our vision for the coming era of GJU strategy: Education for Employment and Entrepreneurship (E for E&E). This corner is going to be sustainable under the umbrella of our new program Program Innovation and Entrepreneurship (PIE). PIE is being gradually empowered by our university system and integrated within our

educational programs and activities, which should, in time, become more reflected on the quality of our graduates within the applied dimension of our university model.

This year we introduce a new section to present training and scholarship opportunities. We are expecting 75 companies to participate in the Fair, and I hope that they all will find this event a platform to interact with our students and among themselves as well. I also hope that this handbook will provide a good reference for this year's (2016) event, and will clearly introduce all participants to our readers and those who are interested.

Finally, I would like to extend my sincere thanks to the team of the Office for Industrial Links (OIL), the Career Guidance for Development Office of King Abdullah II Fund, the Public Relations and Service departments, our students and graduates, and all who contributed to the preparation of this event. I wish you all a successful and enjoyable Career Fair 2016!

*Prof. Natheer Abu Obeid
President of GJU
German Jordanian University*

Training Provider Portrait

INJAZ was founded in 1999 as a USAID-funded project with the mission to inspire and prepare youth to become productive members of their society and accelerate the development of the national economy. In 2001, INJAZ became an independent, nonprofit organization in an event under the patronage of Her Majesty Queen Rania Al Abdullah. Over the last 15 years, INJAZ has operated and implemented its programs with the support of the public and private sectors and over 23,200 volunteers; impacting the lives of around 1 million young Jordanians throughout Jordan.

INJAZ brings various capacity building programs to classrooms in schools, universities and community colleges around the Kingdom, enhancing the students' leadership, business entrepreneurial, economics, problem-solving, communication, and soft skills. The programs focus on high interaction, valuable information, real life experience and teamwork as key factors in the learning process.

Email: recruitment@ipark.jo

Title: iPARK introduction

Up to date, there has been a concentrated effort in developing entrepreneurship and innovation support programs in Jordan, including incubators, accelerators, investment facilitation and tech transfer. At the forefront of all of those programs is the iPARK Technology Hub, (iPARK), which was established in 2003, and has included a technology incubator (iPARK), IP Commercialization Office (IPCO), Queen Rania Center for Entrepreneurship (QRCE), and Bedaya Business Angel Network (Bedaya).

As of 2016, iPARK has had 13 years of continued success in providing entrepreneurs and innovators with support and professional services needed to establish and grow their businesses and/or protect and commercialize their research outputs. This success is attributed to its learnings from international centers of excellence, its active interaction with local entrepreneurs and innovators, and its practical hands-on experience in understanding and matching the demand.

Today, iPARK is uniquely positioned as:

- The first and only technology incubator in Jordan with recognizable incubation operations with KPIs that are geared towards economic development, job creation and entrepreneurship support.
- The first and only central node in the national technology transfer network with agreements and working relationships with multiple major universities and research centers.
- The only national entity that can successfully link innovation outputs with entrepreneurial activities, and the only one that can successfully support entrepreneurial activities towards generating innovation outputs.

iPARK track record and major achievements include:

- Incubating +70 companies (an average of 10 companies per incubation cycle)
- Creating +2,000 direct and value added jobs from its incubation operations
- Achieving +85% success rate of incubated companies (success rate includes not only being in existence after incubation, but also growing in terms of jobs, revenues, and markets)
- Providing +3,500 people with boot camps, training, workshops and mentorship programs
- Managing +350 IPs
- Providing 13 national organizations and main national universities with IP services
- Raising +USD 1,200,000 in angel investment
- Contributing to multiple regional and international success stories of Jordanian entrepreneurs and innovators under iPARK's support - Many of iPARK graduates provide services to Fortune100 companies in strategic areas of operations, have captured significant regional and international market shares, and are leading sector development in current technologies within the ICT, clean technology, healthcare and life sciences sectors.

Our Organization

3Dmena is an advanced technologies incubator, social innovation hub, founding partner of **Fab Lab Amman, Fab Lab Irbid & Refugee Open Ware (ROW)**. ROW is a global humanitarian innovation consortium comprising academic institutions, NGOs, companies and public sector agencies. 3Dmena recognizes that radicalization, violent extremism, forced displacement and youth unemployment are intensifying rapidly and feeding upon each other – while governments lack the resources to cope. Exacerbating this problem is the Fourth Industrial Revolution, which advances automation at the expense of [job opportunities](#) for those with low educational attainment. Without impactful, STEAM-oriented interventions, [millions of refugee children](#) will grow up uneducated or poorly educated. While the world economy transforms at warp speed, communities affected by conflict will fall further behind, and the lack of opportunities for young people will fuel further violence. On top of the present humanitarian crisis, the current interruptions to education and economic development pose a grave challenge to long-term growth and stability.

3Dmena's mission is to ameliorate this worsening crisis by employing **advanced technology to improve human rights fulfillment of both refugees and host communities** in conflict-affected areas –technology such as 3D printing, robotics, the internet of things, brain-computer interface and virtual/augmented reality. We seek to attenuate the immediate effects of conflict while driving long-term economic development, productivity growth, venture creation and employment generation. Moreover, we aim to **reduce the costs of humanitarian relief** by providing displaced populations with access to advanced manufacturing tools, training, raw materials and access to international experts, especially global open-source hardware and software communities.

Where We Work

We are creating a network of innovation centers that crowd-source, co-create and test solutions to the world's toughest humanitarian challenges. To that end, we are building two [Fab Labs](#) – centers for vocational training and business incubation – in Jordan; one in Amman and one in Irbid, funded with over \$7 million from the European Union, USAID, an American philanthropist, the Jordanian private sector, and the Government of Jordan. We're also fundraising for innovation centers dedicated to rescue technology, education and prosthetics.

Company Portrait ABJAD is a smart wearable control device which consists of a washable glove and smart system. The glove has alphabets on it-enables any deaf mute to communicate with others. It is a product that bridges the communication gap between Deaf mute people and normal people.

ABJAD is a new way to interact with technology. Also ABJAD is an innovative new way to help with special-needs and disabilities, specifically those suffering from hearing and talking disabilities and vision disability, to make their lives easier and allow them to integrate in the societies they live in by easing their way of communication.

Established by its founder, Dr. Samih Darwazah in 1978, Hikma Pharmaceuticals PLC is a fast growing multinational pharmaceutical group focused on developing, manufacturing and marketing a broad range of both branded and non-branded generic and in-licensed products. Hikma was listed on London Stock Exchange in 2005 and on Dubai NASDAQ in 2006. The company has 27 state-of-the-art manufacturing facilities in 11 countries, most of which are USFDA and/or MHRA approved. In 2014, Hikma achieved revenues of \$1,489 million. As of December 2014, Hikma had 7,250 employees.

Hikma's team of around 2,000 sales and marketing representatives has helped to establish strong relationships with physicians, hospitals, pharmacies and purchasing groups for hospitals across the MENA region.

Hikma's strong market position makes it the partner of choice for multinational pharmaceutical companies seeking access to the fast growing MENA markets. Over 100 products are in-licensed. Our key partners are CellTrion, Takeda and Astellas.

Hikma's product portfolio, which covers 15 key therapeutic areas, is focused on the patient.

Company Portrait InterContinental Jordan was established in 1963 and was the first 5 star international Hotel in Jordan and celebrated its 50th anniversary in March 2013. It is considered as one of the key hotels within IHG - MEA Hotels. InterContinental Jordan enjoys a prime location at the heart of the diplomatic area of Amman, on the summit of one of the seven hills. Located within walking distance of the old city center, InterContinental Jordan is only a 30-minute drive from Queen Alia International Airport. Background

Jordan Education For Employment is a locally registered non-profit organization that leads a national initiative to create job opportunities for unemployed Jordanian youth. JEFE has partnered with leading businesses, philanthropists, and educational institutions for a strong support base. JEFE is part of a network of affiliated locally-run non-profit organizations based in Egypt, Jordan, Morocco, Palestine, Tunisia and Yemen, a presence in the Gulf, and support organizations in the United States, Europe and the UAE. Since 2006, JEFE has trained over 5000 youth in eight program areas and over twenty sessions, placing 80% directly into jobs while maintaining a six-month retention rate of 67%. JEFE has a vibrant alumni network, with alumni giving back to current trainees and the community.

Our Vision

JEFE's vision is to empower youth with the skills and opportunities they need to build careers that create a better future for themselves, their communities and the world.

Our Mission

The mission of Jordan Education For Employment (JEFE) is to create economic opportunities for Jordanian youth through demand-driven employment and entrepreneurship training. Through technical, vocational, and managerial programs, JEFE aims to empower youth to make a living and contribute to Jordan's future economic development. JEFE's primary aims are (1) reducing unemployment among young Jordanians and (2) building a generation of confident, competent, and professional leaders in Jordan's workforce.

1) Employer Partnerships

JEFE strives to build strong partnerships with private sector companies, every month JEFE holds business development meetings with private sector companies to discuss areas of cooperation and development of relations between the two parties. JEFE collects letters of support and association on a monthly basis to tighten the relationship with the private sector.

2) Outreach and Selection

JEFE seeks balance of need and motivation in selecting program participants. Qualified youth are between the ages of 18 and 26, have been unemployed in the formal economy for at least two months, exhibit socioeconomic need, are currently out of school, and meet employer- and training-partner requirements.

JEFE recruits program participants by advertising in traditional and social media outlets, reaching out through community-based partner organizations in local governorates, and meeting with youth, family members, and community leaders. These multilayered sourcing strategies build strong ties between JEFE and the local community, and are essential for recruiting female candidates.

3) Training

JEFE's Vocational and Technical training programs combine workplace success, soft skills, technical, and entrepreneurship training to prepare beneficiaries with the professional and personal skills needed to excel in their job placements and/or new business start-ups.

4) On-The-Job Training

Upon completion of a JEFE training program, graduates are placed in a one-month, on-the-job training position with partner employers. This allows graduates to apply their newly acquired skills prior to full-time job placement. During this period, JEFE continues to monitor graduates' progress.

5) Job Placement

JEFE works to ensure all graduates are placed in jobs. As JEFE graduates come from low socioeconomic backgrounds with limited formal job opportunities, it is particularly meaningful that they receive full-time jobs with a contract and benefits, opportunities for professional development, reasonable working hours, working conditions that abide by international standards, and healthy and safe workplace.

6) Monitoring and Evaluation (M&E)

JEFE's internal M&E strategy uses SMART (specific, measurable, achievable, realistic, and timely) quantitative and qualitative indicators. These indicators identify project achievements and areas in which JEFE is succeeding or needs improvement. JEFE assesses all training programs for rates of gender acceptance, graduation, job placement, and job retention. Monthly formal check-ups are conducted for graduate progress. Participants are surveyed at the beginning and at the end of each program, as well as six and twelve months after graduation, to track effectiveness in both the short- and long-term. JEFE analyzes this data to maximize the outcome of programs, identify and address emerging problems, assess efficiency, and maintain standards.

رؤيتنا

أن نكون المزود المفضل لحلول البناء في الأردن مرتكزين على ريادتنا المستدامة في الصحة والسلامة وتطوير الموارد البشرية وملتزمين مع جميع شركائنا من خلال تطبيقنا لقيم مجموعة لافارج هولسيم.

لافارج في الأردن

الريادة والجودة والتميز

دخلت مجموعة لافارج السوق الأردني عام ١٩٩٨ من خلال شراؤها حصة في شركة لافارج الاسمنت الأردنية وهي من أكبر وأقدم الشركات الصناعية في الأردن. تمتلك مجموعة لافارج حالياً ما نسبته (٥٠٪) من رأسمال الشركة. ثم في عام ٢٠٠٨ توسعت في سوق الباطون الجاهز من خلال شركة لافارج باطون الأردن.

الطاقة الإنتاجية

للشركة مصنعين للإسمنت يقع أحدهما في الفحيص والآخر في الرشادية.

تبلغ الطاقة الإنتاجية الحالية للشركة ٤ مليون طن.

تبلغ القدرة الإنتاجية السنوية للافارج باطون الأردن ١,٩ مليون م^٣، تنتجها من خلال ٨ مواقع و ١١ خط إنتاج تابعة لها.

تمتلك شركة لافارج أسطولاً كبيراً من الخلاطات والمضخات الخرسانية الحديثة، والتي لا يزيد عمر أكثر من ٦٠٪ منها عن ثلاث سنوات.

الجودة والتميز

تعمل الشركة دائماً على دعم تكنولوجيا الإنتاج وتطوير طرق التصنيع من خلال تطوير وطرح منتجات مبتكرة لخدمة احتياجات الزبائن في السوق.

تدير الشركة أكبر مختبر للباطون في الأردن، يقوم بعمل أكثر من ٣٠ نوع من الفحوص المخبرية للتأكد من جودة المواد الأولية وجودة الباطون في مراحل انتاجه المختلفة.

أكثر من ٨٥٠ موظف

يعملون في لافارج الأردن ويضعون خدمة زبائنهم بأفضل الطرق كهدف وحيد على عاتقهم.

نهدف في لافارج الأردن إلى تقديم تجربة مميزة لزبائننا، من خلال تقديم أفضل الخدمات، الجودة العالية، والإلتزام بالمسؤولية والقيم الإجتماعية.

MANSOUR GLASS منسور للزجاج

Who are we?

We are a single-source glass fabricator, a one-stop shop provider for any glazing requirement, whether exterior or interior, architectural or decorative. Serving the region over the last 3 family generation since 1944, we fabricate, supply and install a wide variety of products, including:

- Flat and bent tempered safety glass
- Fabricated decorative glass
- Laminated safety glass (and bullet proof glass)
- Insulated glazing (known as double glazing)
- Silk screen printed glass
- Art glass, including fused glass, stained glass, mosaic, glass to name a few.
- Fire-rated glazing systems

Why work with us?

-We are involved in the entire supply chain; starting from procuring materials from around the world, managing its transportation and warehousing, fabricating it at the factory where constant development projects are undertaken, managing installation and dispatch through our break-bulk logistics facility, with a dedicated team of architects and designers who manage construction projects around the country.

-Therefore, we provide a wide-variety of graduation project possibilities.

-Contrary to usual plain and boring internships available elsewhere, we offer challenging and educative internships that gets the student involved and actively participating in applying their studies into operations.

-As part of our business growth plans, we are looking for exceptional members to join our team and occupy key positions in the near future.

What do we Offer?

1. Educative Internships

2. Challenging Graduation Projects

3. Fresh Graduate positions

Petra Trading & Investment Co.

Petra Trading & Investment Company was established in 1980. At the outset the vision was to build its core competency around the FMCG business, with an eye on developing a world-class product distribution network in Jordan. Over the next three decades Petra leveraged the power of innovative thinking, long standing expertise, and best in class sales and marketing strategies to accelerate growth.

In 1989, Petra entered the highly competitive snacks business with the promise of delivering superior quality at competitive prices. An opportunity to apply Petra's DNA to the snacks business across Jordan was the deciding factor for Petra to this new industry. Over the next decades Hala Chips brand was introduced to Jordanian consumers and built its equity through innovative products and marketing. Today Hala's brands are part of the fabric of many Jordanian children lives.

In 1999, Procter & Gamble refocused on the Near East region and chose Petra as its sole distributor, this set Petra on a mission to become the most professional and capable FMCG company in Jordan. Petra is partnering with Procter and Gamble to bring the leading FMCG brands to Jordan. In 2000, Petra Launched Pringles in the Jordanian market and has been re-appointed by Kellogg's in 2012. Petra has been named as the official distributor of the 3M consumer products range in Jordan in 2012 and has been named the official distributor of Kellogg's and Duracell range in Jordan in 2015.

The portfolio of brands distributed by Petra matches its commercial success – serving over 30 unique brands across beauty & grooming, household care, home care, office supply & stationary, snacks and cereals categories. Petra's growing Portfolio brings the Company one step closer to fulfilling its vision: "Improving people's lives through our brands, services and employees."
